TO WHOM SO EVER CONCERN.

M/s. Indo Pumps Nasik had supplied the open impeller type vertical submerged pump to handle the mill Waste Water with 50% solids.

The water is content with Bagasse and juice going with Mill cleaning water.

Hence pump is useful to save the 100% sugar contained Bagasse collection at mill area and control the Mill cleaning water recalculation and stop ETP effluent load by Mill Waste Water.

So the certificate is issued by request of Indo Pump, Nasik.
